

Introducing the **SAMBRON J24S**

The multi-purpose handler

Sambron J24S

The complete answer to your handling problems

The remarkable Sambron J24S continues a brilliant concept. This multi-purpose machine can tackle every handling, distribution or stacking job on the farm. Even ditching.

Forward reach of 40" makes many jobs

quicker and simpler. Hydraulic pick-up and lock-in of attachments *from the cab* saves time and tempers.

Instant forward and reverse, controlled by a lever on the dashboard, reduces loading times.

Performance, Reliability and Safety

- * 2 tonnes lift to a height of 12 feet (3.6m).
- * 1.4 tonnes lift to a height of 20 feet (5.94m). * *
- * A Deutz 52HP engine (DIN).
- * 17 m.p.h. maximum road speed (27 k.p.h.).
- * Tenacious grip from 4 wheel drive in low ratio.
- * In high ratio changes automatically to 2 wheel drive for road work.
- * Work-speed pedal, independent of engine speed.
- * All wheels equal in size.
- * Full hydrostatic power steering.
- * Power arm gives freelif, allowing loads to be lifted inside buildings with restricted headroom.
- * Fast lift speed and two-speed descent for quicker loading.
- * An integrated, quick-release attachment system.
- * Complete auxiliary service for hydraulic attachments—as standard.
- * Only 7 feet 6 inches (2.31m) overall height—lower than many tractors.
- * Impact tested cab with uninterrupted visibility of load at all times. Heater and demister add comfort to safety.

Remarkable value

The J24S is more than a valid alternative to a tractor and fore-loader since it gives a new dimension to farm handling by saving time and money. The price is very competitive for such a full specification.

The wide range of attachments
can be changed without the operator
leaving his cab.
