

18 trees felled
by one man in
half an hour...

ONE MAN WITH A

CLINTON CHAINSAW

does the work of a gang . . .

A completely *unskilled* man, using a Clinton Chainsaw *for the first time*, felled 18 trees varying between six and nine inches across, in half an hour without effort or fatigue. Normal cutting time for two men with an ordinary saw . . . at least 2½ back-breaking hours.

That's an 85% cut in Labour cost

*
Re-examine YOUR labour costs in the light of these facts!

On another occasion a Clinton D50 Handy Chainsaw cut a 2' 9" dia. oak—seasoned for 18 months and having three internal knot sections—in ONLY 1 MINUTE 29 SECONDS. And this is by no means outstanding by Clinton standards. Such achievements are the rule rather than the exception. At this rate a Clinton Chainsaw can pay for itself in a matter of weeks. Skill with a Clinton can be attained quickly—giving even more impressive results.

PERFECT PIN-POINT WEIGHT BALANCE

makes the Clinton Chainsaw effortless to operate in any cutting position, and easily portable.

CUTS AT ANY ANGLE

Diaphragm-type carburettor with built-in fuel pump operates perfectly at any angle . . . on its side or upside down . . . allowing the saw to be used in any position. No time-wasting angle adjustments.

FINGERTIP CONTROLS

for easy safe operation. Fingertip trigger throttle gives smooth, positive acceleration and immediate cutting power without risk of stalling. Saw is stationary when engine idles.

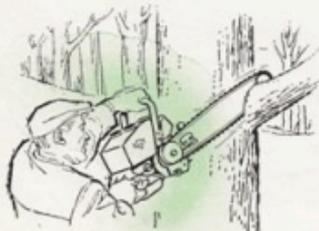

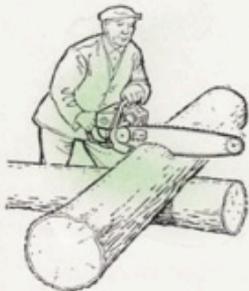

FULL POWER

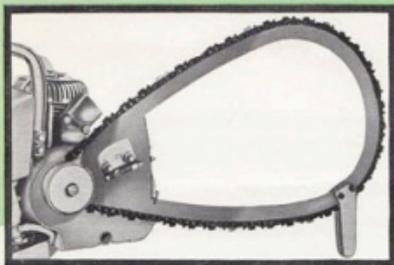

is transferred from the 4 or 6 h.p. engine direct to the saw by sensational new centrifugal-type, positive-action clutch.

SELF-ADJUSTING SPRAG

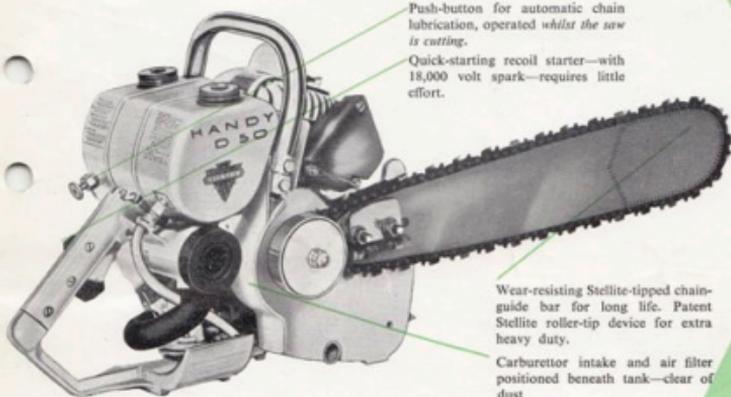

engages in timber, allowing the saw to eat through the tree by virtue of its own weight, without pressure from the operator.

Straightline cutting—a feature of Clinton Chain sawing—makes parallel slicing simple.

BOW-SAW ATTACHMENT
for planking and
ground-logging . . . can
be fixed in a minute.

Push-button for automatic chain lubrication, operated whilst the saw is cutting.

Quick-starting recoil starter—with 18,000 volt spark—requires little effort.

Wear-resisting Stellite-tipped chain-guide bar for long life. Patent Stellite roller-tip device for extra heavy duty.

Carburettor intake and air filter positioned beneath tank—clear of dust

complete
reliability

CLINTON

**ALL-PURPOSE
CHAINSaws** for

- FELLING • LOPPING • CROSS CUTTING • NOTCHING
- LOG SAWING • ROOT CUTTING • PARALLEL SLICING
- HEDGING • OVERHEAD CUTTING • PRUNING
- FLUSH-TO-GROUND CUTTING • BUCKING AND UNDER-
BUCKING • FIREWOOD CUTTING • BRUSH CLEARING

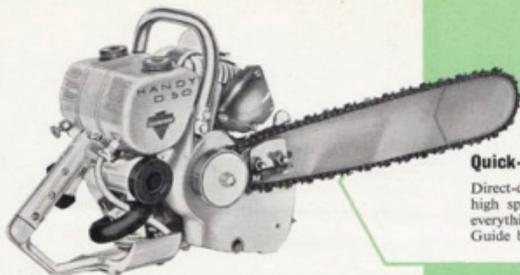

and have applications in many industries

FORESTRY • TIMBER • FARMING • SAWMILLING • BUILDING SITE CLEARANCE

BUS ROUTE PRUNING • HIGHWAY AND TELEPHONE WAY CLEARANCE

ON ESTATES • AT COUNTRY HOMES • ON CAMP SITES • IN PUBLIC PARKS

and also for SILAGE CUTTING - an entirely new application

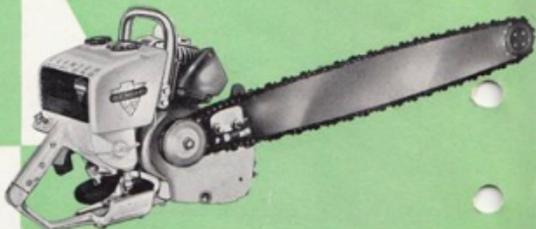

Quick-starting D50/D55 Handy

Direct-drive chainsaw for all-purpose cutting at high speed. Easy to handle and economical. Cuts everything but the biggest trees. Weighs only 23 lbs. Guide bar lengths 14", 16", 20".

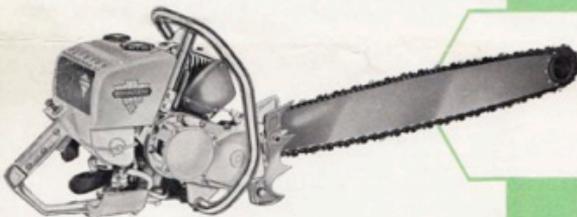

Quick-starting D60/D65 Professional

Direct-drive Rotary-roller clutch transfers full power from engine to saw. Makes light work even of the bigger timber. Guide bar lengths 14", 16", 20", 26". Bow-saw attachment 15".

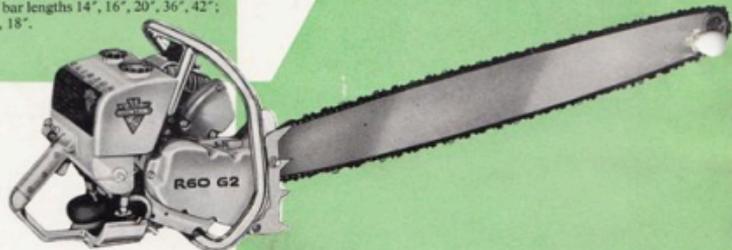

Quick-starting R60G1 Selecto-speed Professional

3-speed transmission. Low speed gear ratio 3:77:1 — high speed gear ratio 1.5:1 — intermediate speed gear ratio 2:05:1. Gears easily and quickly interchangeable. Guide bar lengths 14", 16", 20", 36", 42". Bow-saw attachments 15", 18".

Quick-starting R60G2 Dual-Matic Professional

Finger-flick gives automatic choice of two cutting speeds . . . high speed direct drive or low gear lugging power for the biggest timbers. Guide bar lengths 14", 16", 20", 36", 42". Bow-saw attachments 15", 18".
